

SILHOUETTE SOFT

Silhouette Soft is a unique tailor made treatment offering a redefined face with restored volume and a reduction in wrinkles. The treatment is adapted to the patients' needs and preferences and can be complemented with other aesthetic treatments.

The facial aging process causes changes in the skin due to sluggishness of the metabolic processes in the skin cells leading to a decrease in new collagen formation and an increase in pigmentation. This is the reason for the sagginess, drooping and tired looking profile of the aging face. Bone and fat loss also contribute to these changes and appearance of the face.

Silhouette Soft is a minimally invasive procedure with minimum downtime and no scar formation that is used on all areas of the face and neck to restore these areas to a younger and fresher look. The technique involves state of the art suspension threads and takes thirty minutes in your doctor's office to complete

Which areas can be treated?

- Contours of the face
- Jaw line
- Cheeks and mid-face areas
- Eyebrow
- Neck

What is the effect?

- An immediate lifting action
- Restoration of lost collagen
- Why is Silhouette Soft so beneficial?
- Immediate natural lifting effect
- Progressive restoration of lost collagen
- Entirely re-absorbable
- No incision
- Last 12-24 months

Ideal treatment for eyebrow, cheeks, midface and jaw line that can be done separately or all at once.

WHAT ARE THE BENEFITS OF SILHOUETTE SOFT®?

- Minimally invasive, non-surgical facelift treatment
- Facial volume is lifted, restoring a fresher, more youthful appearance
- SILHOUETTE SOFT® requires no general anaesthesia or sedation
- Virtually no recovery or downtime is required
- Very little swelling, bruising, and far less discomfort compared to a traditional surgical facelift
- SILHOUETTE SOFT® provides immediate results.
- Additional lifting effects achieved over time. The sutures in the skin stimulate collagen production for an even more and longer lasting lifted effect
- Corrects mid and lower face sagging in the brow, cheek, jowls, or neck.
- Smoothens prematurely aging skin
- About 20% lifting of surgical facelift
- More achievable than a surgical facelift
- SILHOUETTE SOFT® achieves a natural look
